

AGBOGIDI OGHENERHUNOR SAMUEL

Software Engineer | Backend Developer

ABOUT ME

Computer Science student and backend-focused software engineer passionate about building scalable, real-world applications with Python, Django, and FastAPI. Experienced in designing robust systems, API development, and deploying production-ready software.

EDUCATION

B.Sc. Computer Science

Benson Idahosa University
Final Year · Expected June 2027

- Data Structures, Algorithms, Databases, Software Engineering

SKILLS

Backend

Python, Django, DRF, FastAPI, REST APIs, JWT, Celery, Redis

Database

PostgreSQL, Redis, SQL

Frontend

HTML, CSS, JavaScript, Tailwind, Bootstrap

Deployment

Docker, AWS EC2, Linux, Nginx, Gunicorn, Git

Growing

System Design, TypeScript, React, React Native, Cloud

Soft Skills

Problem Solving, Collaboration, Technical Writing, Agile

KEY PROJECTS

PointPulse

Tournament management platform (Django, Redis, Celery, React Native)

Hospital Management System

Multi-role patient, appointment & prescription system (Django, DRF)

SIWES Logbook Manager

Digital logbook for students & coordinators (Django, DRF)

FastAPI Tournament API

High-performance API with SQLAlchemy, Alembic & JWT

WORK EXPERIENCE

SKYSENXHUB

2026 – Present

Software Engineering Intern

Working on backend engineering, API development, and application architecture. Building and testing features using Python, Django, FastAPI, PostgreSQL, and REST APIs while gaining experience with Git, collaborative development, debugging, testing, and modern software engineering practices.

- Developing backend systems and RESTful APIs with Django & FastAPI
- Working with PostgreSQL, testing, debugging, and collaborative Git workflows

NIGER CONSTRUCTIONS

Jul 2025 – Sep 2025

IT Support & Hardware Intern

Provided hands-on IT support and hardware maintenance across the organization. Assisted with computer troubleshooting, Windows 11 installation, laptop repairs, printer maintenance, server room support, and power infrastructure including UPS systems, batteries, and inverters.

- Diagnosed technical issues and maintained reliable workplace technology
- Supported server room operations and power infrastructure

INDEPENDENT

Freelance

Freelance Software Developer

Design and develop custom software solutions for personal and client projects. Work across the full development lifecycle — from requirements gathering and system design to implementation, testing, debugging, and deployment.

- Built backend systems, RESTful APIs, and database architectures
- Developed projects including Soundora (music platform) and TurnupCity
- Technologies: Python, Django, FastAPI, React Native, PostgreSQL
